Basis Data

The screenshot displays the phpMyAdmin web interface. The left sidebar shows a tree view of the database structure, with 'kpdb' selected. The main content area shows the 'kpi_group' table in the 'kpdb' database. The table has 4 rows of data. The interface includes a top navigation bar with tabs for Browse, Structure, SQL, Search, Insert, Export, Import, Privileges, Operations, Tracking, and Triggers. The main content area shows the query results for the 'kpi_group' table, with a status bar indicating 'Showing rows 0 - 3 (4 total, Query took 0.0033 seconds.)'. Below the query results, there are options for filtering and sorting the data. The table columns are: id, title, description, level, parent_id, created_at, and updated_at.
